

White Interior Design Inspiration : Long Island

White Castle

A castle is not exactly my dream home and if you only add white and black, then it's worse. But there is something about the **White Castle** and I'm not sure what. Believe me I've been looking at these pictures for over an hour now and it's somehow addictive. Designed by architect Steve Blatz for a private art dealer - Olivier Renaud-Clément - the 1,500-square-foot immaculate city loft was intended to showcase his collection of art & Italian design from the 60s and 70s.

The clean sharp shapes, the mixture between a highly modern architecture and the furniture, the no-doors living space plus the monochromatic scheme really appeal to me. Do you like this white palazzo? - [T Style Magazine](#)
